

My Mysterious Animal - 9.évfolyam
(Kapcsolódó cikk: Különleges állatok kertje)

Segédanyag: üres A4 lap, színes ceruzák, filcek, kártyák vagy állatos képek

A tanulók párban dolgoznak. Mindenki választ magának egy állatot a kártyák közül. Egy párnak így két állat jut. A két állat keresztezésével egy teljesen új fajt kell kitalálni, melyet még senki nem látott a természetben. A cél minél fantáziadúsabban körülírni az állatot angolul. Az új állatról rajz is készül.

My Mysterious Animal

This is a zeraffe (zebra+giraffe).

It's black and white. I has got 4 legs.

It has got a long neck.

It lives in very cold countries.

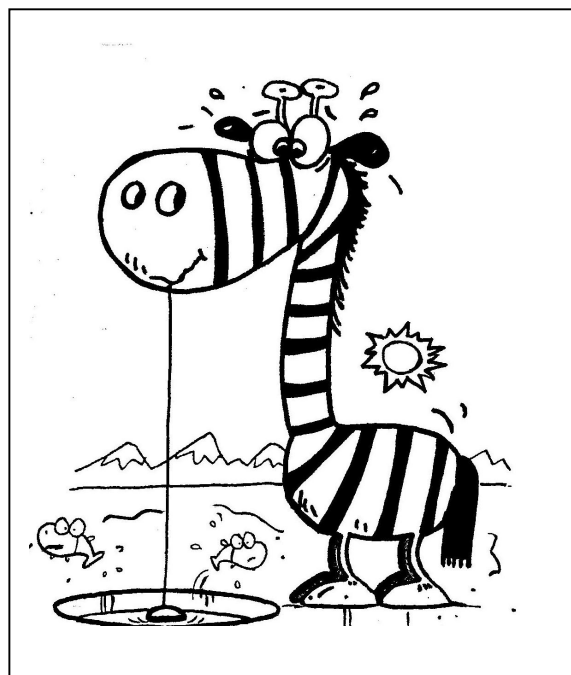

It eats about 25 fish a day. Look, it is fishing now.

The zeraffe likes to play with a ball.

It cannot swim. It sleeps 12 hours a day.

It lives about 63 years. It drinks lemonade.

The zeraffe is my favourite animal.

Cocose =cock+mouse

Cocose has got feather and fluffy hair ,too. They love dancing. They send messages to each other through dancing. They can't swim and they are afraid of the dark. Their sight is bad, their hearing and smelling are amazing. They have g t three small livers. Their belly is shiny. These species can be found only in Japan. Their eggs are in the tip of their tail and they lay them in the moist ground. Their saliva has the same effect as drugs. They are carnivore. They like being alone, so they don't need mates.
